Nye Mountain *	3895' (1187)		
Couchsachraga Peak *	3820' (1164)		

Elevations listed are shown in feet (meter) and are from the latest USGS survey. The original list of the 46 summits which show an altitude of 4000 feet above sea-level, or over, according to the USGS survey of the region concluded in 1897 constitute the official climbers list for membership. Later surveys have concluded that four summits are actually below 4,000 feet. One summit, McNaughton has been shown to stand at 4,000 feet and is optional.
